

Letter of Partnership

[Level Access](#) empowers organizations with the advanced software, expert managed services, and training solutions needed to create accessible and legally compliant digital experiences, including websites, mobile apps, digital products, gaming software, documents, and more.

Powerful technology and tools provide access to advanced testing, monitoring, and reporting, equipping teams with the integrated software needed to confidently manage a comprehensive digital accessibility program at scale.

Managed services include access to expert manual testing and evaluation, remediation guidance, training and enablement, in-house legal support, and accessibility program management for long-term organizational success.

Partnership

Vernier Science Education partnered with Level Access on February 6, 2025 to help make its digital assets inclusive for all. In partnership with Level Access, Vernier Science Education has communicated its commitment to providing digital content that is built with accessibility in mind to create an inclusive experience for its audience.

Level Access can confirm that Vernier Science Education is making a genuine effort to remediate any digital content available on the Graphical Analysis App so that it conforms to the [Web Content Accessibility Guidelines \(WCAG\)](#) Version 2.1, Level AA. These guidelines are technical standards produced by the [World Wide Web Consortium \(W3C\) under their Web Accessibility Initiative \(WAI\)](#).

Level Access performed regular assessments to monitor and detect WCAG 2.1 AA issues, which should be corrected to the best of Vernier Science Education's ability. Remediation efforts are supported and validated by a team of accessibility experts and testers at Level including testers with disabilities.

Vernier Science Education has made progress in remediating identified WCAG issues and has communicated its commitment to continual improvement.

Conclusion

Vernier Science Education has remained engaged with Level Access since the beginning of our engagement term to test and remediate accessibility issues.

Level Access recommends and expects that the accessibility effort continues, at minimum through February 9, 2027 to ensure that any remaining areas of the digital asset that are within Vernier Science Education control, conform with WCAG 2.1 AA success criteria.
